# Kazi Nahid

Dhaka, Bangladesh | +880 1911-624403 | bsse1437@iit.du.ac.bd | linkedin.com/in/knah1d | github.com/knah1d

## Experience

**Junior Software Engineer** April 2026 – Present
*LEADS Corporation Limited (part-time April–October 2026, full-time from November 2026)* *Dhaka, Bangladesh*

- Built an **LLM**-based CV parsing pipeline on a self-hosted model (**Ollama**, Qwen2.5-3B), using PDFBox text extraction and schema-constrained JSON output to turn PDF CVs into structured candidate profiles
- Developed AI candidate shortlisting that scores profiles against job descriptions across multiple job circulars, using deterministic skill matching and rule-based extraction to cut hallucinations and keep results reproducible
- Implemented maker-checker approval with audit trails across nearly 30 payroll modules of a banking HRM platform (**Java**, Spring Boot **microservices**, **Oracle**), migrating them to a shared **Hibernate**-based framework
- Engineered Provident Fund and Benevolent Fund modules end to end in **Spring Boot** and **Angular**, with record locking against concurrent withdrawals, duplicate checks, and automatic loan settlement
- Integrated **Microsoft Graph**/MSAL to sync interview schedules to Outlook with online meeting links

**Software Engineer Intern** October 2025 – March 2026
*LEADS Corporation Limited* *Dhaka, Bangladesh*

- Built a biometric attendance sync service and scheduled jobs that generate daily and monthly attendance flags
- Created employee profile modules with validation rules and a scheduled probation reminder email job

## Projects

**Terra Audit – Final-Year Project** May 2026 – Present
*Python, FastAPI, Next.js, PostgreSQL, XGBoost, LLM* terra-audit.vercel.app | github.com/knah1d/terra-audit

- Built a full-stack carbon credit verification (MRV) platform that turns Sentinel-1 satellite radar data from **Google Earth Engine** into auditable carbon credit calculations under two Verra methodologies (VM0051, VM0042)
- Developed a **FastAPI** backend (20+ API modules, JWT auth, multi-tenant **PostgreSQL**, background job worker) and a **Next.js**/**TypeScript** frontend with interactive maps
- Trained **Random Forest** and **XGBoost** models to detect rice irrigation cycles from radar time series; integrated an **LLM** (Groq, structured JSON output) to explain each calculation in plain language
- Wrote 179 automated tests run in **GitHub Actions** CI; **Dockerized** and deployed on Vercel and Render

**ShopEase – Team Project** May 2025 – August 2025
*Spring Boot, Spring Security, JWT, PostgreSQL* github.com/knah1d/shopease

- Architected an e-commerce backend in **Spring Boot** using Clean Architecture and Domain-Driven Design
- Integrated the SSLCommerz payment gateway and JWT-based authentication with **Spring Security**
- Designed REST APIs for user, product, order, and payment management, backed by **PostgreSQL** on Neon

**StockVision – Team Project** July 2025 – September 2025
*Python, FastAPI, Scikit-learn, Pandas, React, Chart.js* github.com/knah1d/StockVision

- Engineered 17 technical features (moving averages, volatility, lagged prices) over 1.79M daily Dhaka Stock Exchange records (1,007 securities, 2008–2022) and benchmarked 6 **Scikit-learn** regressors with a year-based train/test split
- Built the **FastAPI** prediction service and a **React**/Chart.js dashboard for stock analysis, comparison, and sectors

## Technical Skills

**Languages**: Java, Python, TypeScript, JavaScript, SQL, C, C++
**AI/ML**: LLMs (Ollama, Groq), Structured Output, Scikit-learn, XGBoost, NumPy, Pandas, Google Earth Engine
**Frameworks**: Spring Boot, Spring Security, Hibernate/JPA, Angular, FastAPI, Next.js, React
**Databases**: PostgreSQL, Oracle
**Tools**: Docker, Git, GitHub Actions, JUnit, Mockito, pytest, Microsoft Graph, MinIO, Apache POI
**Domain**: ERP/HRM, Payroll, Tax, Provident Fund, Recruitment, Maker-Checker Approval Workflows

## Education

**University of Dhaka, Institute of Information Technology** Dhaka, Bangladesh
*Bachelor of Science in Software Engineering; CGPA: 3.34/4.00 (through 7th semester)* *Expected November 2026*

**Govt. Science College** Dhaka, Bangladesh
*Higher Secondary Certificate (HSC); GPA: 5.00/5.00* *2021*
